1. Place the base of the EZ Weavy form on the floor. Weaves strap through the horizontal slits as shown.

2. Now weave the vertical straps through the slits.

3. Make sure all your straps are even. Line up the ends of all your straps to ensure that they are the same length.

4. Weave the rest of the vertical straps then go back and weave the horizontal ones. Make sure the over and under weaves are all correct and that your ends are even.
5. Fold the top part of the EZ Weavy form to create a box shape and tape it together. Put it on top of the woven base.

6. Weave the ends of the straps that are attached to the base into the sides as shown.

7. Take a new strap and start weaving it horizontally to create sides. Weave the straps from the base into the sides as you go.

When you reach the end of a strap, lay it on top from where you began.

8. Now you’ve reached the top! To finish the edge, fold over the straps that are underneath the top row and weave the tails into the bag until they are all covered.

9. Now add another strap on top. Fold and weave the remaining straps back into the bag.
10. To make the handle, fold a strap in half. Slide the strap onto the top row, 4 squares from the edge as shown.

11. Weave the loose ends of the strap into the other side of the bag. Measure 6 strap widths from the end and fold up.

12. Insert 2 straps on either side of where you started.

13. Fold each end up and out so it is perpendicular to itself. Weave it into the straps next to it until it is smooth.
14. Now you can start covering the handle. Crisscross the 2 straps around the middle strap as shown.

15. Now crisscross the 2 straps in front and to the back of the middle strap.

16. When you get to the end of your handle, tuck the end of the straps into the bag the same way as you did in step 13.

17. Carefully rip the slits of your EZ Weavy Form & remove it from your bag.

Now you are done! **UNBEWEAVABLE!!!**
