

4 IN A ROW™

INSTRUCTIONS

PLAYERS: 2

OBJECT: Be the first player to get four playing pieces in a row either horizontal, vertically or diagonally.

BEFORE PLAY: Set up playing board; attach legs to both sides of the blue board. Each player selects a color and takes all of the playing pieces of that color and places them in front of them.

PLAY: Youngest player begins by placing one of their pieces in any one of the columns at the top of the playing surface. The playing piece will drop to the bottom. The second player takes a playing piece of their color and drops it into any opening at the top of the playing surface. Players may wish to play their game pieces so that they block the efforts of the opposing player. Only one playing piece can be played on a player's turn. Play continues alternating between players.

WINNER: The first player to get four of their color playing pieces in a row either vertically, horizontally or diagonally.

TO PLAY AGAIN: Dump playing pieces out of playing surface by turning knobs at the base of the game board. Reset the knobs to begin a new game.
