

The kit contains:

x2

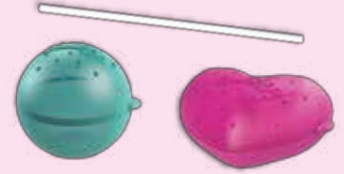

x2

x2

x2

- Mix 1 bag each of baking soda, cornstarch and epsom salt into a bowl. **Stir well** with a **completely dry** fork or hands. Note: 1 bag of each ingredient makes 3 bombs.

Baking Soda

+

Cornstarch

+

Epsom Salt

Mix the powder with dry hands or dry fork

NOTE:
Make sure to fill exactly to the lines inside the measuring spoon.

Note, making bath bombs is like baking!
For best results, add the water slowly as you mix. Make sure your mixture does not become too wet and goopy. If it's too wet, the Succinic Acid will react by fizzing right away. Sometimes high humidity can even cause this premature reaction. **If you find that your mixture is too wet, you can add a little cornstarch from your own supplies to absorb the moisture.**

- Add in exactly 25ml of water (15ml + 5ml + 5ml), 5ml of fragrance oil and 5ml glycerin to the powders and stir well. **Break clumps with fork until there are no big clumps!**
NOTE: While mixing, keep the mixture loose and NOT compressed together. Mix for at least 2 minutes.

25ml of water

+

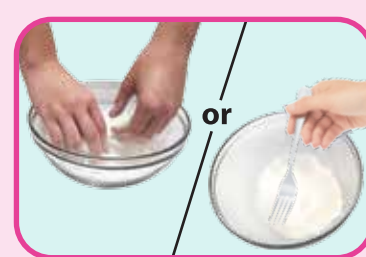

5ml of fragrance oil

+

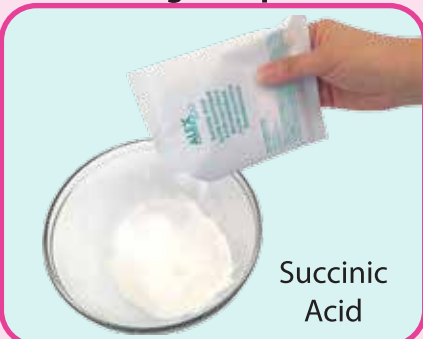

5ml of glycerin

Mix the powder

- Add 1 bag of succinic acid to other ingredients and mix the powder **gently** with **dry** hands or fork **thoroughly** until there are **no big clumps!** Mix for another 2 minutes.

Succinic Acid

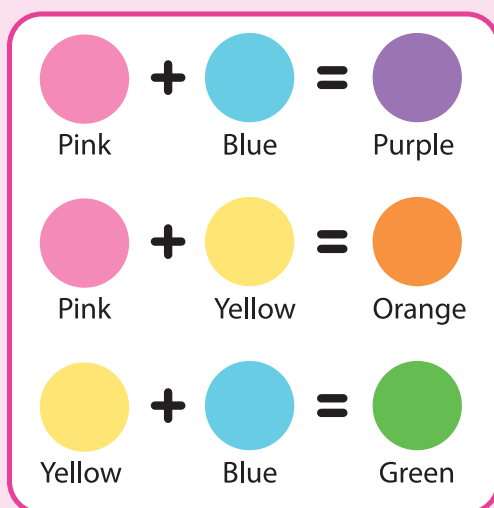

Mix the powder

- Divide the powder into separate bowls for different colors.

5. Add food coloring one drop at a time to **one bowl of powder**. Few drops will give you pastel colors. More drops will give you darker colors. Limit 7 drops of color to each bowl for best results. Mix with a fork until **the color is even and there are no big clumps**. Use your fingers to further break up colorant as needed. Repeat with each bowl of powder to create the colors you want to use! Mix drops to create new colors! (see chart)

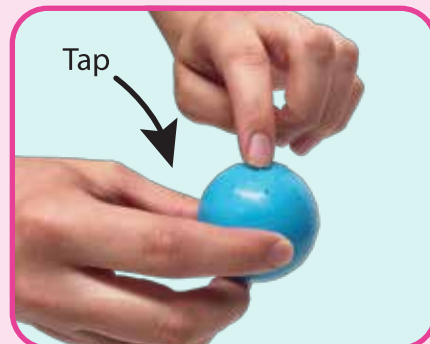

NOTE: Once the color is evenly mixed together, try to work quickly as the combination will dry out. It may dry out after 15 minutes.

6. Using a clean and dry mold, overfill both sides of the mold with lightly packed powder. You can use all one color or layer different colors to create different looks. Carefully, press both sides of the filled molds together. The extra powder will fall out so do this over a bowl.

Squeeze the mold together tightly! Tap on the top and bottom and slowly pull the mold apart.

If the bomb starts to crumble, add more material and press mold together again.

Remove the bomb and **let dry for 24 hours**. If you cannot remove the bomb from the mold, crumble the powder back into a bowl and try again!

Make sure to wipe the mold clean between each bomb.

Wash hands thoroughly with soap and warm water. Repeat if necessary.

Once dry, drop into the bath & watch it fizz!

Relax & Enjoy!

CAUTION: Patch test for sensitivity on hidden area first. Do not use on broken or irritated skin. Do not ingest. If irritation occurs, discontinue use.

WARNING: Do not use in the eye area or on lips. Rinse eyes immediately if product comes into contact with them. Use under adult supervision.

WARNING: Succinic Acid may cause eye irritation in case of accidental contact with the eyes. Avoid contact with the eyes. Avoid contact with the nose or avoid inhalation of the powder. Adult supervision is required.
