Braidy Beads

LOG ON TO WATCH VIDEO INSTRUCTIONS!

Go to www.alextoys.com
Type in the quick search: Braidy Beads

Choose 3 strands of beads.
Place the first bead in each string into the clasp notches.

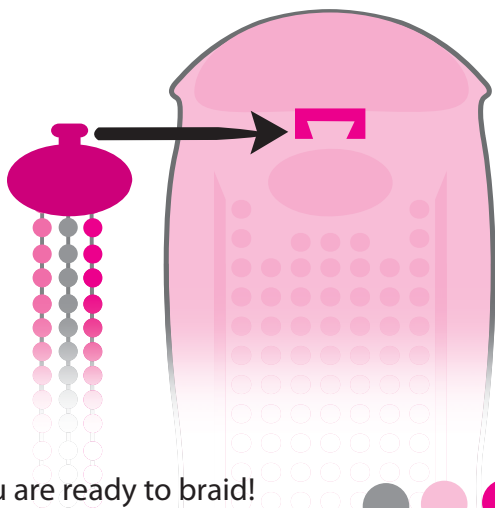

Snap the cover on top

Press together firmly.

Snap the clasp into the machine.

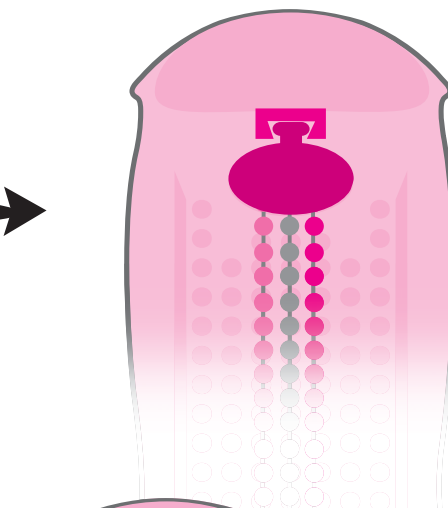

Now you are ready to braid!

NOTICE:

2 beads are on the outside of the braid.

It should look like this.

After you braid a little, place the clear slider in the notches. The slider will keep your braid in place.

SLIDER NOTCHES

THE BOW CLASP

The bow clasp has 2 parts.

This is the clasp you will start beading with.

START CLASP

COVER

This is the clasp you will use to end the bracelets.

END CLASP

COVER

Continue braiding and moving the slider along.

When you reach the bottom, pull the slider and the braided bracelet up and continue braiding more. Do not worry, the slider will keep your bracelet together.

When you reach your desired length, trim the excess beads with scissors. Place the beads into the **END CLASP** and add the cover.

Now just snap together the two parts of the bow clasp to wear your bracelet.

FUN IDEA: snap 2 or 3 bracelets together to make a necklace!
