### GAMEPLAY:

- Place the Waiter in the shallow end of the pool, or in the tub. Divide the cups evenly among the players/teams.

- Starting with the youngest player, each player/team takes turn placing cups on the tray. Players may decide how much or how little water to add to their cup first, but it cannot be empty when it is placed on the tray!

- The player/team that causes the Waiter to completely clear his tray is eliminated - the last player/team who does not tip the waiter wins! NOTE: If you only cause the Waiter to lose SOME of the cups, play continues as normal.

- For an added challenge, try to stack cups on top of cups to build a tower on top of the tray. The last player to successfully stack a cup before the tower falls is the winner!
