INSTRUCTIONS

Contents
Game Board, 12 “Go Fish” Game Tokens (3 each of 4 colors -- Grouper Greens, Yellowtail Yellows, Red Snappers, and Bluegill Blues), 4 “Go Fish” Playing Pieces (1 each of 4 colors), Spinner

Set Up
1. Punch out the Fish playing pieces, fold, and place in bases. Each player takes a playing piece and places it on the matching color “dock” space. (During the game, players will collect fish that match the color of their Fish playing piece.)
2. Punch out the tokens, mix, and place face down in the pond. Each player picks one token from the pond before play begins. You may look at your token but place it face down in front of you.
3. Assemble the spinner.
4. The youngest player will begin the game.

Play
Each player, at his/her turn, spins the spinner:

• If a number is spun, the player moves that number of spaces clockwise along the game path. The player then follows the direction indicated on the space.
• If “Go Fish” is spun, the player does not move his/her playing piece, and instead draws a fish from the pond. Collected fish are placed in a row, face down, near the player.
• It is okay for multiple players to share the same game board space during the course of the game. Play now passes to the player to the left. The game continues until one player collects three fish of his/her color.

Game Spaces
• “Go Fish” The player takes a token from the pond and places it face down in his/her row. (If there are no fish left in the pond, a player may ask another player for a fish of his/her color.)
• “Ask!” The player asks one player for a fish of his/her color. If the player has that color token, he/she must give one (and only one) to the asking player. If the asked player doesn’t have a fish of that color, that player says “Go, Fish,” and the asking player may draw a fish from the pond.
• “Shark!” The player must put one of his fish back into the pond to feed the shark. If you have more than one token, you may choose which one to put back.

Note:
Be sure to always mix up the tokens in the pond every time you draw one or put one back in.

Winner
The first player to collect the three fish of his or her matching color wins the game.
