PLAY:

The first player rolls the three dice and determines their score using the chart below. If a player rolls a 'bust' their turn is over and they receive 0 points. At this point, the player may end their turn and record their score on the scoresheet, or the player may continue to roll the dice.

If the player continues, the player rolls all three dice and determines their score using the chart. The player adds their score from this roll to the score from the first roll to determine their score for the round. The player may continue rolling until they wish to stop or until they roll a 'bust'. If a 'bust' is rolled, the player loses all points scored in the round and receives 0 points.

After the first player's turn is completed, play continues to the left.

THE WINNER:

The first player to reach 1000 points is the winner. For a shorter game, play is to 500 points.
