Type in the quick search: Giant Paper Flower

GET READY!

Place all of your materials on a flat surface.

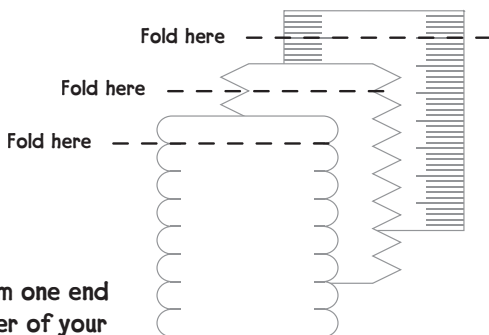

GET SET!

Pick out 5 sheets of tissue paper. They do not all have to be the same shape or color. Stack the pieces of tissue paper one on top of another so they overlap exactly.

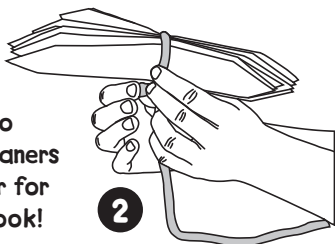

Step 1: Fold the paper

Fold the stack of tissue paper like an accordion. Make sure your folds are even.

Step 2: Add the stem

Bend a pipe cleaner 3 inches from one end and wrap it tightly over the center of your folded stack. Twist the short end of the pipe cleaner so it does not stick out. The long end of your pipe cleaner becomes the flower stem.

IDEA:

Twist two pipe cleaners together for a cool look!

GO!

Voilà! Now that you know how to make your very own giant paper flowers, display them in the vase that came with your kit. Have fun and enjoy your bright, colorful bouquets!

Step 3: Fluff up the petals!

Fan out the petals. Gently lift each layer of petals apart from one another, one by one. Pouf it all out so it looks nice and full!
