get ready!
before you can learn to tie, you have to lace up your shoe.
choose a shoe. now choose a lace. thread through the first two holes,
nice and straight! are your two ends even? ok, great!

now criss-cross all the way up your shoe.
did you think you could do it? i knew you could, too!

get set!
to tie your laces nice and tight, it's good to know your left from right.

pocket the right lace over the left.

make a loop with the left lace.

now make an X with your loops and poke the right loop in,
just like the X that you made to begin!

go!
take your laces, make an X.

now pull both laces nice and straight. are your laces tight? you're doing great.

slip your fingers inside and pull your bow tight.

congratulations! i knew you would do it right!
