Princess Purple
Instructions - Game 1

Contents: 33 Cards, Players: 2-6

Start by shuffling the deck. Deal the cards to all players, one at a time, until all the cards have been dealt. Players look at their hands and then discard any of their pairs, face up in front of them. Players should not mix their matched pairs with any other players. Starting with the player to the left of the dealer, players take turns offering the player to the left their hand, so one card can be picked. Note: the offered cards should be faced away from the “picker” so cards cannot be seen. This player chooses one card from the offered hand. If a new match has been created, he/she should lay those cards down, face up. Players continue to do this until all pairs have been matched and one player is holding the Princess Purple card. The player with the Princess Purple card is the automatic winner! The other players add up their matches to see who collected the most pairs.
Princess Purple

Instructions - Game 2

Contents: 33 Cards, Players: 2-6

This deck can also be played as a memory game by removing the Princess Purple card. Shuffle the cards, then spread them out face down on the playing surface in a square with 8 cards across and 4 cards down. The youngest child goes first and flips over one of the cards so that everyone can see which picture has been revealed. The player flips over another card in the same manner. If the two cards match, the player removes the pair and places them in front of himself/herself. If a match has been made, that player gets another turn. If a match is not made, that player turns the cards back over and the player to the left takes their turn. Once all of the pairs have been matched, the player who has the most pairs is the winner.
