OBJECT OF GAME: To place as many objects as you can on Milton, without “Tilting Milton” out of his hammock.

MATERIALS: Milton, plastic hammock and tree, 10 large objects and 10 small objects.

PREPARATION: Place the hammock in the tree. Set the pins on each end of the hammock, into the grooves on the tree (see diagram 1); be sure the hammock swings freely.
Place the tree in the center of the table, and put Milton in the hammock. Remove all the objects from the box, and separate them into two groups of large and small objects. Place each group of objects next to the tree.

THE OBJECTS: There are 20 objects in all. 10 large and 10 small. The small objects are related to the large objects and are called accessory objects.

LARGE OBJECTS: SMALL OBJECTS:
Hat Feather
Glass Straw
Bird’s Nest Eggs
Fishing Pole Fish
Saucer Cup
Pitcher Ice Cubes
Newspaper Eyeglasses
Plate Sandwich
Beehive Bee
Tree Branch Bird

One player is chosen to go first, and play continues in turn, to the left.

THE PLAY: The first player chooses any large object, and places the peg of that object in any hole in Milton’s body. His turn is over. NOTE: Players may hold Milton or the hammock, with one hand, when placing objects.
The next player takes the small object, which is the accessory to the large object placed by the preceding player, and places that small object in the large object. (See Diagram on back showing how small objects are placed in large objects)
The same player then chooses any large object from the table, and places it in any hole in Milton’s body. His turn is over. The next player must then place the small object into the large object and place another large object on Milton. Each of the players follow turn.

TILTING MILTON: If a player places either a large or small object in Milton and causes Milton to tilt and fall out of the hammock, that player is out of the game.
When Milton tilts, all the objects are removed from Milton’s body and replaced on the table. Milton is put back into the hammock again. The game continues as before.

WINNING THE GAME: The last player left wins the game.
